9. ☐ Other _____

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the closest prior art reference of record is the patent to Reese et al. (cited in the Interview Summary mailed 4/24/06). However, the terminal disclaimer dated 4/3/06 has been accepted and the claims are now in condition for allowance. The current application reads over Heisch (cited in the final action); since, Heisch does not teach or suggest the features of Claims 1-2, 24 of recording profile information...indicating the last byte of a multi-byte instruction, the features of claims 34, 46 of recording...information describing an interval of the program's execution and processor mode during the profiled interval of the program, the profile information having a data structural form efficiently tailored to annotate the profiled binary code with sufficient processor mode information to resolve mode-dependency in the binary coding, or the features of claims 52 and 70 of a processor mode change that is not inferable from the opcode of the instruction that induces the processor mode change taken together with a processor mode before the mode change instruction with the profile information further identifying each distinct physical page of instruction text executed during the execution interval.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
